

ALEXIS GOMEL

Data Scientist | Analytics Developer

alexis.gomel@gmail.com +34 600425388 alexisgomel.com linkedin.com/in/alexisgomel

Barcelona, Spain (Remote Ready)

PROFESSIONAL PROFILE

Ph.D. Physicist transitioning into Industrial Data Science & Data Analysis. Experience in numerical modeling, SQL optimization, and high-performance dashboard development. Proven track record of reducing data processing costs by 97% and improving query speeds by 10x through architectural optimization. Background in rigorous academic research (Postdoc & PhD) with high-impact publications, now applying scientific precision to solve scalable business problems.

PROFESSIONAL EXPERIENCE

Analytics Developer & Data Engineer | LaMagnetica Jun 2025 – Nov 2025 Barcelona, Spain

- BigQuery Optimization:** Engineered a data architecture strategy that reduced processed data volume by 64% (peaking at 93%) and improved query response times to less than a tenth of previous times.
- Full Stack Analytics:** Developed high-performance dashboards in Looker Studio and Power BI, bridging the gap between backend data engineering (GCP/SQL) and strategic business visualization.
- Operational Efficiency:** Implemented partitioning strategies and automated pipelines, significantly reducing operational costs and ensuring scalability.

Career Sabbatical & Professional Transition | Relocation & Upskilling Mar 2024 – May 2025 Geneva → Barcelona

- Upskilling:** Dedicated period for intensive self-study to transition from academic research to industrial data science, focusing on modern cloud stacks (GCP) and business intelligence tools.

Postdoctoral Researcher (Mathematics of Planet Earth) | University of Reading Apr 2023 – Feb 2024 Reading, United Kingdom

- Stochastic Modeling:** Conducted advanced research on climate "Tipping Points" using stochastic systems and probability theory.
- Algorithm Development:** Developed custom algorithms in Python and MATLAB to detect early warning signals in noisy time series data.
- International Collaboration:** Collaborated within the TIPES project (Horizon 2020), coordinating with distributed European research teams.

PhD Researcher & Data Analyst | University of Geneva 2018 – 2023 Geneva, Switzerland

- Complex Data Analysis:** Produced and processed experimental datasets from high-energy laser physics and wave flumes using automatizations.

- **Predictive Modeling:** Developed numerical models to predict non-linear dynamic behaviors, validating theoretical frameworks against data.
- **Scientific Communication:** Authored 4 peer-reviewed articles in high-impact journals (e.g., *Physical Review Letters*).

TECHNICAL SKILLS

Languages & Scripting:

Python (Pandas, Numpy, Scikit-learn), SQL (Standard & BigQuery), MATLAB, LaTeX.

Data Visualization:

Power BI, Google Looker Studio, Matplotlib, Dash.

Cloud & Engineering:

Google Cloud Platform (BigQuery, Functions), ETL Processes, Data Architecture.

Mathematical Analysis:

Stochastic Systems, Time Series Analysis, Bayesian Statistics, PCA.

EDUCATION

PhD in Physics (10/10)	2018 – 2023
<i>University of Geneva, Switzerland</i>	
Bachelor & Master in Physics (8.89/10)	2009 – 2017
<i>Universidad de Buenos Aires, Argentina</i>
